

# HEALTH CARE WITH AI

# Description

How can AI help in the field of healthcare, fitness and medicine?

## Prompts

- How can AI help people focus on and improve their mental health?
- How can AI help overcome/ track life-threatening diseases?
- Building AI chatbots for medical consultation

## Example Statement:

### AI Personal Trainer

Affording a personal trainer can be very expensive for most people today who wants to start their fitness journey. Tackle this problem and create a one stop solution for people looking for proper guidance and feedback in their workout routine without the hassle of seeking a human trainer.

## Disclaimer:

The Problem Statements are meant to be a Guide, you are free to innovate however you want as long as it sticks to the track.
