FINTECH

Description

Use technology to build solutions within modern finance.

Prompts

- How can digital banking be improved under the current circumstances?
- Investing platform and money saving for young people
- Mobile banking for the visually impaired
- Investments in small scale entrepreneurs

Example Statement:

Banking for the unbanked

Financial inclusion and credit offering is challenging, especially in markets where there is poor or limited information about a customer's credit worthiness. How can we enable institutions to offer banking solutions, based on alternative credit scoring, to people that do not currently have access to basic financial services?
