# PRODUCTIVITY

Description

How can technology, which can be one of the biggest sources of distractions today, be used to enhance productivity while working.

Prompts

- An application for cutting down distractions/wasted time
- How can we track our productively spent time?
- How can a user figure out their major sources of distraction?

Example Statement:

Management of Mail Boxes

Company Employees are involved with a lot of outgoing and incoming mails. Suggest a solution to increase the productivity of the employee by segregating the mails related to internal and external domains. The aim is to get a better management of Mail Boxes using a portal. Reports should be made available and proper analysis of the mails should be carried out.

Disclaimer:

The Problem Statements are meant to be a Guide, you are free to innovate however you want as long as it sticks to the track.
